

# How to become a Repak ELT scheme collector

COMPLETE APPLICATION

PROMOTE COMPLIANCE

REPORT MONTHLY

COLLECT SCHEME TYRES

Authorised collectors with the appropriate waste permits may apply to be contracted to Repak ELT to collect scheme tyres from our member outlets.

## How to get started?

### Complete application

[www.repakelt.ie](http://www.repakelt.ie)

To complete your application along with your company details you will need your

- National Waste Collection permit
- Insurance details
- Waste permit (if required)
- EPA license (if required)
- Tax clearance cert
- Third party verification forms (TPVF)

### Promote Compliance to your customers

If your customers want to continue to have you as their waste collector they need to join Repak ELT.

All tyre operators are required to join Repak ELT before the start of the scheme to be compliant.

From October 1st Authorised scheme collectors will only be permitted to collect scheme tyres from Repak ELT member outlets.

Contracted scheme collectors can only collect scheme tyres from member outlets from October 1st 2017

## 5 steps to Scheme Tyre Collection

### 1. OPENING STOCK

Contracted scheme collectors make a declaration of the opening stock of waste held on their premises at the start of the scheme. Audits and inspections are a routine part of the operation of the scheme.

### 2. REPORT MONTHLY

Reporting is monthly for all tyre operators. Reporting is online and is due by the 15th of the following month. Late reporting will affect payment processing.

### 3. SCHEME TYRES

Contracted scheme collectors may only collect from registered scheme member outlets. Only scheme tyres may be collected i.e. those reported at zero vEMC rate and those where the appropriate vEMC has been paid.

### 4. WHAT TO COLLECT

When collecting scheme tyres from Repak ELT member outlets if you have any concern that the tyres for collection are not scheme tyres i.e. have not been reported and where relevant, funded through the scheme, contact Repak ELT. All suspected anomalies must be reported.

### 5. ZERO VEMC TYRES

Agricultural and construction tyres have a zero rated visible Environmental Management Cost (vEMC). These tyres are paid for by the retailer and reported by all operators handling them.
