

Repak ELT Company Limited by Guarantee was incorporated on 24 July 2015 under Part 18 of the Companies Act 2014. The Company was established to operate a producer responsibility compliance scheme in order to comply with the legal obligations imposed on operators in the tyre industry by S.I. No. 664 of 2007 Waste Management (Tyres and Waste Tyres Regulations) 2007. It commenced operations on 1 November 2015 and replaced another scheme TRACS (Tyre Recovery Activity Compliance Scheme) whose approval expires on 30 October.

Phase 2 of Repak ELT's operations commenced on 1 October 2017 under S.I. No. of 2017 Waste Management (Tyres and Waste Tyres) Regulations 2017. These new amended Regulations tasked Repak ELT with the establishment of a full PRI scheme with responsibility for data capture and information gathering on the flow of tyres from when they are first placed on the market until they are reused or reach end of life and to ensure that they are disposed of in an environmentally sound manner through recycling/recovery.

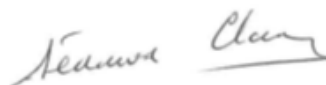

In meeting the above, Repak ELT aims to achieve high levels of Membership satisfaction by delivering on the terms of its Approval granted by the Minister for the Communications, Climate Action & Environment, in a cost effective and professional manner.

Compliance is monitored by process measures and internal audits. Compliance is also maintained by the timely implementation of corrective actions and the assessment and management of risk.

Repak ELT is committed to the continual improvement of its performance through interaction with members, staff, collectors, regulatory authorities and the community. This continual interaction is achieved through the setting, monitoring and review of quality objectives and targets.

To assist with the above, Repak ELT has implemented a Management System that meets the requirements of ISO 9001:2015.

Meeting these standards is the responsibility of the entire team. Repak ELT is therefore committed to working with all stakeholders to support effective operation of the company's Quality Management System and the achievement of goals and specific Quality Objectives.
